

# WE ARE NATIONAL STRAND

## PROUD LEADER OF USA-MADE & OWNED STRANDED WIRE PRODUCTS

With over 40 years of industry experience, National Strand is the largest US-Made and owned producer of guy, messenger, and static strands critical for today's broadband, telecom, and power utility industries.

Our BEAD & BABA compliant strand creates a strong backbone for a successful implementation of the telecommunications infrastructure around the world. Whether it is expanding or upgrading existing infrastructure for the broadband/telecom industries, we have the stranded wire essential for project success.

## Key Products & Applications

Built for strength and corrosion resistance, our ASTM-compliant stranded wire is essential for building and maintaining telecom, fiber optic, broadband, CATV infrastructure, and communication towers, including cell phone, radio, and TV towers.

### ***Messenger & Span Wire Guy Strands for Telecommunications & Broadband:***

Ideal for supporting the structural integrity of owned poles, attached utility poles, and cell towers. Also designed to support communication cables, telecom/broadband cables, and CATV wire applications.

### ***Lashing Wires:***

Promote optimal security for installing aerial cables and support messenger wire to hold the cables firmly in place.

### ***OSP (Outside Plant) Cables:***

Supportive wire used in structural framework for aerial cable systems. It acts as the main support cable from which other cables are suspended or attached.

### ***Utility Wires:***

Combine high conductivity with robust strength for efficient power transmission across extensive networks.

### ***Specialty Cables:***

Custom-designed cables for specific applications.

## Quality Certifications

Our BABA compliant wire adheres to the highest industry standards, including ASTM, CSA, and telecommunications-specific compliance marks, ensuring the quality and reliability of our products.

### ***Key Codes:***

NAICS: 332618 | CAGE: 0RZV4

SIC: 3496 | DUNS: 122076441

## We Build Stronger Opportunities for Our Partners

### ***Reliability, Scalability, & Fast Delivery:***

Our strands are reliable and dependable, and we handle large orders efficiently to ensure rapid delivery using our national distribution network and multiple manufacturing facilities in the United States.

### ***Custom Solutions:***

We manufacture cables tailored to meet specific technical requirements to provide innovative solutions that enhance network efficiency and safety. We also offer custom cut-to-length solutions – saving time and money on your project.

### ***National Distribution Network with Multiple U.S. Plants:***

We built a nationwide network of manufacturing facilities equipped with state-of-the-art machinery with a connected network of distributors that guarantees accessibility and support throughout the nation.
